EDUCATION

Pontificia Universidad Católica de Chile <i>M.A. in Applied Economics (Candidate)</i>	Santiago, Chile 2024 – 2026
Universidad San Antonio Abad del Cusco <i>B.A. in Economics</i>	Cusco, Peru 2015

PROFESSIONAL EXPERIENCE

Ministry of Education of Peru – Planning and Budget Unit <i>Economics Specialist</i>	Lima, Peru Mar 2020 – Present
- Design and evaluate higher education policy interventions using advanced econometric techniques and causal inference methods. - Conduct large-scale data analysis of higher education systems and public budget allocation using automated tools and machine learning approaches. - Lead cross-functional teams in data-driven projects that inform national education strategy.	
Ankawa Global Group – Intl. Center for Higher Applied Studies <i>Lead Data Analyst</i>	Cusco, Peru Apr 2019 – Feb 2020
- Designed machine learning algorithms for gender-based violence prevention using predictive modeling. - Conducted nationwide statistical analysis of gender violence databases to generate policy-relevant insights. - Developed automated data pipelines for real-time monitoring of violence indicators.	
Center for Research and Consulting (CICEPP) <i>Research Assistant & Data Analyst</i>	Cusco, Peru Feb 2018 – Feb 2020
- Coordinated quantitative methodology and research design for policy-oriented projects. - Assisted in training researchers and students in data analysis using STATA, Python, and R.	

OPEN SOURCE SOFTWARE

usebcrp Stata & Python Library 🌐	2024
Developed packages for both Stata and Python to automate retrieval of macroeconomic time series from Peru's Central Bank API.	
enahodata Stata & Python Library 🌐	2023
Created widely-used libraries (available in Stata/Python) for automating household survey (ENAHO) processing. (DOI: 10.5281/zenodo.15029906)	
usecasen & usebcch Stata & Python (In Development)	2025
Developing automated tools for retrieving Chilean socioeconomic data (CASEN) and Central Bank indicators, replicating the success of the Peruvian libraries.	

APPLIED PROJECTS

- Demand for higher education in Peru:** Econometric analysis using discrete choice models and administrative data (2022).
- Economic and social costs of victimization:** Cost-benefit analysis combining survey data and ML techniques (2022).
- Gender-based violence among migrants:** Mixed-methods study on vulnerable populations in Peru (2021).

TECHNICAL SKILLS

Languages: Spanish (Native), English (Fluent), Italian (Basic).

Econometrics & Stats: STATA (Advanced), Python (pandas, scikit-learn), R (tidyverse), Causal Inference.

Data & Viz: SQL, Power BI, Tableau, ArcGIS, Web Scraping, API Integration.

Tools: Git/GitHub, LaTeX, VS Code, Markdown.

FIELDS OF INTEREST

Causal Machine Learning · Applied Policy Evaluation · Development Economics · Economics of Education
